EXPERIENCE

Brillica Services, Dehradun— Web developer intern

March 2023 - present

During my internship as a web developer at Brillica Services, Dehradun, I have been fortunate to work with both frontend and backend technologies. In the frontend, I have honed my skills in creating web applications using HTML, CSS, vanilla JavaScript, React.js, Next.js and Typescript. On the backend, I have gained valuable experience working with Node.js, Express.js, and MongoDB to build robust and dynamic web solutions.

EDUCATION

Brillica Services, Dehradun— Full stack development

August 2022 - February 2023

Graphic Era Hill University, Dehradun— BCA

July 2019 - August 2022

The Asian Academy, Pithoragarh— *senior secondary*

March 2017 - May 2018

PROJECTS

OTT Platform Web App— Fully responsive movie platform with top notch technologies such as React, Redux and Scss.

- React 18 and its latest features - React hooks and state management - Easy maintainable and scalable folder structure, - Global state containers with Redux Toolkit - Fetch data from Rest API with Axios - custom hooks - Carousel/slider without library - Infinite scrolling - React Router DOM Version 6 - Loading Skeleton while fetching data from API - Error handling & 404 forbidden page - Responsive layout with perfectly placed media queries.

TypeScript website using github API -

building a dynamic website using TypeScript that interacts with the GitHub API to fetch user data. Not only that, but also implemented a powerful search functionality to easily locate specific GitHub users.

Car Rental Web App using Next.js 13-

- Use Next.js 13 App Router and Server side Rendering - Implement Advanced Search Functionality - Filtering Capabilities - Optimize Metadata and SEO - Custom filter, Combo box, and modal elements - Maintain a well-organized file and folder structure.
